- ¹ For the 2011 National Household Survey (NHS) estimates, the global non-response rate (GNR) is used as an indicator of data quality. This indicator combines complete non-response (household) and partial non-response (question) into a single rate. The value of the GNR is presented to users. A smaller GNR indicates a lower risk of non-response bias and as a result, lower risk of inaccuracy. The threshold used for estimates' suppression is a GNR of 50% or more. For more information, please refer to the National Household Survey User Guide, 2011.
- ² Includes self-employed with an incorporated business and self-employed with an unincorporated business. Also included among the self-employed are unpaid family workers.
- ³ The code and title of this category are not found in the North American Industry Classification System (NAICS) 2007; this category is needed due to the combination of NAICS sub-sectors performed during the coding process.
- ⁴ The code and title of this category are not found in the North American Industry Classification System (NAICS) 2007; this category is needed due to the combination of NAICS industry groups performed during the coding process.
