<sup>1</sup> For the 2011 National Household Survey (NHS) estimates, the global non-response rate (GNR) is used as an indicator of data quality. This indicator combines complete non-response (household) and partial non-response (question) into a single rate. The value of the GNR is presented to users. A smaller GNR indicates a lower risk of non-response bias and as a result, lower risk of inaccuracy. The threshold used for estimates' suppression is a GNR of 50% or more. For more information, please refer to the National Household Survey User Guide, 2011.

<sup>2</sup> In the past, this variable was called Labour force activity.

[3](#) 'Highest certificate, diploma or degree' refers to the highest certificate, diploma or degree completed based on a hierarchy which is generally related to the amount of time spent 'in-class.' For postsecondary completers, a university education is considered to be a higher level of schooling than a college education, while a college education is considered to be a higher level of education than in the trades. Although some trades requirements may take as long or longer to complete than a given college or university program, the majority of time is spent in on-the-job paid training and less time is spent in the classroom.

For further definitions, refer to the National Household Survey Dictionary, Catalogue no. 99-000-X. For any comments on collection, dissemination or data quality for this variable, refer to the Education Reference Guide, National Household Survey, Catalogue no. 99-012-X2011006.

[4](#) 'High school diploma or equivalent' refers to graduation from a secondary school or equivalent. It excludes persons with a postsecondary certificate, diploma or degree.

[5](#) 'Postsecondary certificate, diploma or degree' includes 'apprenticeship or trades certificates or diplomas', 'college, CEGEP or other non-university certificates or diplomas' and university certificates, diplomas and degrees.

[6](#) 'Trades certificate or diploma (other than apprenticeship)' includes trades certificates or diplomas such as pre-employment or vocational certificates and diplomas from brief trade programs completed at community colleges, institutes of technology, vocational centres, and similar institutions. 'Registered Apprenticeship certificate' includes Certificate of Qualification, Journeyperson's designation.

[7](#) 'Trades certificate or diploma (other than apprenticeship)' includes trades certificates or diplomas such as pre-employment or vocational certificates and diplomas from brief trade programs completed at community colleges, institutes of technology, vocational centres, and similar institutions.

[8](#) 'Registered Apprenticeship certificate' includes Certificate of Qualification, Journeyperson's designation.

[9](#) Comparisons with other data sources suggest that the category 'University certificate or diploma below bachelor level' was over-reported in the National Household Survey (NHS). This category likely includes some responses that are actually college certificates or diplomas, bachelor's degrees or other types of education (e.g., university transfer programs, bachelor's programs completed in other countries, incomplete bachelor's programs, non-university professional designations). We recommend users interpret the results for the 'University certificate or diploma below the bachelor's level' category with caution.

For any other comments on data quality for this variable, refer to the Education Reference Guide, National Household Survey, Catalogue no. 99-012-X2011006.

[10](#) 'Earned doctorate.' This category refers to persons who have completed a doctorate degree awarded by a university. This includes, for example, Doctor of Philosophy (Ph.D.) and Doctor of Juridical Science (S.J.D.). It does not include honorary doctorates.
