

MEDIAN INCOME IN THE PAST 12 MONTHS (IN 2012 INFLATION-ADJUSTED DOLLARS)
2012 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Subject	Alaska			
	Total		Median income (dollars)	
	Estimate	Margin of Error	Estimate	Margin of Error
Households	251,651	+/-2,883	67,712	+/-1,894
One race--				
White	74.8%	+/-0.8	74,573	+/-2,186
Black or African American	3.8%	+/-0.5	42,825	+/-16,764
American Indian and Alaska Native	10.9%	+/-0.6	42,556	+/-4,068
Asian	3.7%	+/-0.4	56,473	+/-6,519
Native Hawaiian and Other Pacific Islander	N	N	51,342	+/-25,364
Some other race	N	N	48,775	+/-15,299
Two or more races	5.3%	+/-0.7	52,321	+/-6,607
Hispanic or Latino origin (of any race)	4.8%	+/-0.5	51,396	+/-5,424
White alone, not Hispanic or Latino	72.0%	+/-0.8	75,354	+/-2,081
HOUSEHOLD INCOME BY AGE OF HOUSEHOLDER				
15 to 24 years	4.9%	+/-0.5	41,108	+/-3,613
25 to 44 years	37.7%	+/-1.0	67,520	+/-2,399
45 to 64 years	43.0%	+/-0.9	80,208	+/-3,502
65 years and over	14.4%	+/-0.6	46,666	+/-3,609
FAMILIES				
Families	166,400	+/-3,894	80,219	+/-2,105
With own children under 18 years	49.4%	+/-1.7	71,971	+/-3,546
With no own children under 18 years	50.6%	+/-1.7	89,005	+/-2,667
Married-couple families	74.1%	+/-1.6	92,410	+/-2,444
Female householder, no husband present	17.8%	+/-1.4	37,234	+/-2,886
Male householder, no wife present	8.1%	+/-0.8	52,863	+/-7,732
NONFAMILY HOUSEHOLDS				
Nonfamily households	85,251	+/-3,436	41,357	+/-1,344
Female householder	45.4%	+/-2.3	39,146	+/-3,355
Living alone	35.3%	+/-2.0	33,433	+/-2,397
Not living alone	10.1%	+/-1.4	66,522	+/-14,762
Male householder	54.6%	+/-2.3	43,665	+/-4,168
Living alone	43.6%	+/-2.5	39,305	+/-3,719
Not living alone	11.0%	+/-1.6	76,919	+/-10,468
PERCENT IMPUTED				
Household income in the past 12 months	25.1%	(X)	(X)	(X)
Family income in the past 12 months	26.6%	(X)	(X)	(X)
Nonfamily income in the past 12 months	19.0%	(X)	(X)	(X)

Explanation of Symbols:

An '*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An 'l' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An 'u' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
