SEX BY COLLEGE OR GRADUATE SCHOOL ENROLLMENT BY TYPE OF SCHOOL BY AGE FOR THE POPULATION 15 YEARS AND OVER
Universe: Population 15 years and over
2012 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

	Alaska	
	Estimate	Margin of Error
Total:	574,398	+/-969
Male:	300,043	+/-1,307
Enrolled in public college or graduate school:	18,591	+/-2,504
15 to 17 years	0	+/-143
18 to 24 years	8,344	+/-1,322
25 to 34 years	6,165	+/-1,432
35 years and over	4,082	+/-951
Enrolled in private college or graduate school:	4,733	+/-1,138
15 to 17 years	0	+/-143
18 to 24 years	1,556	+/-792
25 to 34 years	1,485	+/-683
35 years and over	1,692	+/-593
Not enrolled in college or graduate school:	276,719	+/-2,953
15 to 17 years	15,899	+/-926
18 to 24 years	34,969	+/-1,731
25 to 34 years	48,623	+/-2,207
35 years and over	177,228	+/-1,790
Female:	274,355	+/-1,371
Enrolled in public college or graduate school:	24,747	+/-2,178
15 to 17 years	139	+/-161
18 to 24 years	10,247	+/-1,395
25 to 34 years	7,328	+/-1,225
35 years and over	7,033	+/-1,354
Enrolled in private college or graduate school:	3,533	+/-1,122
15 to 17 years	0	+/-143
18 to 24 years	769	+/-502
25 to 34 years	1,068	+/-506
35 years and over	1,696	+/-774
Not enrolled in college or graduate school:	246,075	+/-2,777
15 to 17 years	14,176	+/-1,006
18 to 24 years	23,705	+/-1,436
25 to 34 years	44,662	+/-1,890
35 years and over	163,532	+/-1,902

Explanation of Symbols:

An "''" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An "''" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The category "Not enrolled in college or graduate school" includes those who were not enrolled in school as well as those who were enrolled in levels other than college or graduate school.

While the 2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
