

B17001C

POVERTY STATUS IN THE PAST 12 MONTHS BY SEX BY AGE (AMERICAN INDIAN AND ALASKA NATIVE ALONE)
Universe: American Indian and Alaska Native alone population for whom poverty status is determined
2012 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

	Alaska	
	Estimate	Margin of Error
Total:	100,236	+/-3,521
Income in the past 12 months below poverty level:	22,456	+/-2,344
Male:	11,537	+/-1,405
Under 5 years	1,389	+/-306
5 years	368	+/-214
6 to 11 years	1,685	+/-402
12 to 14 years	623	+/-246
15 years	178	+/-146
16 and 17 years	533	+/-222
18 to 24 years	1,564	+/-507
25 to 34 years	1,250	+/-332
35 to 44 years	1,329	+/-546
45 to 54 years	1,514	+/-368
55 to 64 years	801	+/-244
65 to 74 years	209	+/-118
75 years and over	94	+/-42
Female:	10,919	+/-1,304
Under 5 years	1,405	+/-295
5 years	175	+/-54
6 to 11 years	1,530	+/-494
12 to 14 years	447	+/-137
15 years	132	+/-76
16 and 17 years	402	+/-133
18 to 24 years	1,771	+/-518
25 to 34 years	1,604	+/-339
35 to 44 years	1,104	+/-380
45 to 54 years	1,314	+/-431
55 to 64 years	652	+/-208
65 to 74 years	173	+/-85
75 years and over	210	+/-136
Income in the past 12 months at or above poverty level:	77,780	+/-3,843
Male:	38,880	+/-2,492
Under 5 years	3,643	+/-628
5 years	571	+/-228
6 to 11 years	3,362	+/-598
12 to 14 years	2,513	+/-670
15 years	989	+/-298
16 and 17 years	1,514	+/-391
18 to 24 years	3,698	+/-513
25 to 34 years	5,662	+/-957
35 to 44 years	5,262	+/-1,055
45 to 54 years	4,845	+/-621
55 to 64 years	3,988	+/-615
65 to 74 years	2,026	+/-402
75 years and over	807	+/-155
Female:	38,900	+/-1,978
Under 5 years	2,580	+/-564
5 years	716	+/-364
6 to 11 years	3,410	+/-590
12 to 14 years	1,940	+/-585
15 years	655	+/-237
16 and 17 years	1,355	+/-296
18 to 24 years	4,182	+/-639
25 to 34 years	5,344	+/-625
35 to 44 years	4,254	+/-700
45 to 54 years	5,703	+/-732
55 to 64 years	4,693	+/-521
65 to 74 years	2,099	+/-325
75 years and over	1,969	+/-476

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
