

AGGREGATE FAMILY INCOME IN THE PAST 12 MONTHS (IN 2012 INFLATION-ADJUSTED DOLLARS) BY FAMILY TYPE BY AGE OF HOUSEHOLDER
Universe: Families
2012 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

	Alaska	
	Estimate	Margin of Error
Aggregate family income in the past 12 months (in 2012 inflation-adjusted dollars):	15,961,790,500	+/-525,607,327
Married couple family (dollars):	13,567,587,700	+/-529,672,116
Householder 15 to 24 years (dollars)	206,359,400	+/-52,069,167
Householder 25 to 34 years (dollars)	1,846,499,000	+/-175,166,658
Householder 35 to 44 years (dollars)	2,690,265,200	+/-226,894,003
Householder 45 to 54 years (dollars)	3,818,095,700	+/-317,106,143
Householder 55 to 59 years (dollars)	1,863,604,100	+/-192,140,407
Householder 60 to 64 years (dollars)	1,503,607,600	+/-183,020,497
Householder 65 to 74 years (dollars)	1,317,603,900	+/-254,597,423
Householder 75 years and over (dollars)	321,552,700	+/-60,529,496
Other family (dollars):	2,394,202,700	+/-213,412,350
Male householder, no wife present (dollars):	989,610,200	+/-179,443,383
Householder 15 to 24 years (dollars)	55,569,000	+/-34,347,954
Householder 25 to 34 years (dollars)	190,385,200	+/-63,578,525
Householder 35 to 44 years (dollars)	211,248,900	+/-83,037,836
Householder 45 to 54 years (dollars)	264,677,400	+/-66,214,078
Householder 55 to 59 years (dollars)	73,302,800	+/-38,045,797
Householder 60 to 64 years (dollars)	147,426,200	+/-110,207,903
Householder 65 to 74 years (dollars)	22,466,600	+/-10,586,759
Householder 75 years and over (dollars)	24,534,100	+/-12,240,033
Female householder, no husband present (dollars):	1,404,592,500	+/-136,378,500
Householder 15 to 24 years (dollars)	51,593,200	+/-14,855,286
Householder 25 to 34 years (dollars)	271,862,600	+/-64,964,594
Householder 35 to 44 years (dollars)	308,278,300	+/-69,894,895
Householder 45 to 54 years (dollars)	334,542,600	+/-64,121,788
Householder 55 to 59 years (dollars)	126,969,100	+/-49,608,349
Householder 60 to 64 years (dollars)	105,758,500	+/-48,644,973
Householder 65 to 74 years (dollars)	142,838,200	+/-57,347,850
Householder 75 years and over (dollars)	62,750,100	+/-22,821,470

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
