

TENURE BY HOUSEHOLD TYPE (INCLUDING LIVING ALONE) AND AGE OF HOUSEHOLDER

Universe: Occupied housing units

2012 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

	Alaska	
	Estimate	Margin of Error
Total:	251,651	+/-2,883
Owner occupied:	159,427	+/-3,595
Family households:	115,917	+/-3,398
Married-couple family:	94,110	+/-3,253
Householder 15 to 34 years	11,290	+/-1,153
Householder 35 to 64 years	67,534	+/-2,642
Householder 65 years and over	15,286	+/-1,220
Other family:	21,807	+/-1,894
Male householder, no wife present:	8,301	+/-1,134
Householder 15 to 34 years	1,352	+/-501
Householder 35 to 64 years	6,203	+/-1,016
Householder 65 years and over	746	+/-216
Female householder, no husband present:	13,506	+/-1,361
Householder 15 to 34 years	2,170	+/-685
Householder 35 to 64 years	8,961	+/-1,140
Householder 65 years and over	2,375	+/-581
Nonfamily households:	43,510	+/-2,912
Householder living alone:	35,155	+/-2,436
Householder 15 to 34 years	3,838	+/-1,053
Householder 35 to 64 years	20,784	+/-2,165
Householder 65 years and over	10,533	+/-1,196
Householder not living alone:	8,355	+/-1,418
Householder 15 to 34 years	1,743	+/-854
Householder 35 to 64 years	5,998	+/-1,158
Householder 65 years and over	614	+/-238
Renter occupied:	92,224	+/-3,507
Family households:	50,483	+/-2,955
Married-couple family:	29,138	+/-2,336
Householder 15 to 34 years	13,740	+/-1,689
Householder 35 to 64 years	14,420	+/-1,437
Householder 65 years and over	978	+/-369
Other family:	21,345	+/-2,432
Male householder, no wife present:	5,230	+/-1,045
Householder 15 to 34 years	2,466	+/-704
Householder 35 to 64 years	2,623	+/-715
Householder 65 years and over	141	+/-117
Female householder, no husband present:	16,115	+/-2,204
Householder 15 to 34 years	7,338	+/-1,548
Householder 35 to 64 years	8,025	+/-1,346
Householder 65 years and over	752	+/-344
Nonfamily households:	41,741	+/-2,603
Householder living alone:	32,110	+/-2,382
Householder 15 to 34 years	10,196	+/-1,602
Householder 35 to 64 years	17,464	+/-1,770
Householder 65 years and over	4,450	+/-789
Householder not living alone:	9,631	+/-1,473
Householder 15 to 34 years	5,944	+/-1,058
Householder 35 to 64 years	3,435	+/-870
Householder 65 years and over	252	+/-166

Explanation of Symbols:

An '*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
