

MEAN INCOME IN THE PAST 12 MONTHS (IN 2013 INFLATION-ADJUSTED DOLLARS)
2013 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Subject	Alaska			
	Total		Mean income (dollars)	
	Estimate	Margin of Error	Estimate	Margin of Error
All households	246,015	+/-2,720	88,758	+/-2,357
With earnings	86.9%	+/-0.8	84,481	+/-2,280
With interest, dividends, or net rental income	44.2%	+/-1.7	9,589	+/-1,821
With Social Security income	19.8%	+/-0.9	15,334	+/-568
With Supplemental Security Income (SSI)	4.1%	+/-0.7	8,659	+/-953
With cash public assistance income	6.9%	+/-0.9	4,136	+/-360
With retirement income	19.7%	+/-1.0	26,998	+/-1,778
FAMILY INCOME BY NUMBER OF WORKERS IN FAMILY				
All families	165,431	+/-3,617	101,544	+/-3,206
No workers	7.4%	+/-0.8	68,933	+/-16,024
1 worker	30.2%	+/-1.7	78,593	+/-6,045
2 workers, husband and wife worked	39.3%	+/-1.7	118,037	+/-4,183
2 workers, other	10.3%	+/-1.1	92,665	+/-8,846
3 or more workers, husband and wife worked	10.0%	+/-1.0	138,341	+/-6,067
3 or more workers, other	2.8%	+/-0.5	104,454	+/-16,268
PER CAPITA INCOME BY RACE AND HISPANIC OR LATINO ORIGIN				
Total population	735,132	*****	32,474	+/-804
One race--				
White	66.4%	+/-0.4	38,553	+/-965
Black or African American	3.4%	+/-0.3	28,777	+/-6,680
American Indian and Alaska Native	14.3%	+/-0.5	17,901	+/-1,593
Asian	5.7%	+/-0.3	24,179	+/-2,395
Native Hawaiian and Other Pacific Islander	1.2%	+/-0.1	14,277	+/-2,185
Some other race	1.3%	+/-0.3	27,213	+/-7,267
Two or more races	7.7%	+/-0.7	18,740	+/-1,856
Hispanic or Latino origin (of any race)	6.6%	*****	24,588	+/-2,745
White alone, not Hispanic or Latino	62.5%	+/-0.1	39,343	+/-1,028
PERCENT IMPUTED				
Household income in the past 12 months	28.9%	(X)	(X)	(X)
Family income in the past 12 months	30.0%	(X)	(X)	(X)
Individual income in the past 12 months	23.2%	(X)	(X)	(X)

Explanation of Symbols:

An "*" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.

An "****" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

In data year 2013, there were a series of changes to data collection operations that could have affected some estimates. These changes include the addition of Internet as a mode of data collection, the end of the content portion of Failed Edit Follow-Up interviewing, and the loss of one monthly panel due to the Federal Government shut down in October 2013. For more information, see: [User Notes](#)

Questions for "interest or dividends," "net rental income" and "royalties, estates or trusts" were asked separately for the first time during non-response follow-up via Computer Assisted Telephone Interview (CATI) and Computer Assisted Personal Interview (CAPI). Prior to 2013 these questions were asked in combination, "interest, dividends, net rental income, royalties, estates, or trusts."

While the 2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ
