INDUSTRY BY SEX AND MEDIAN EARNINGS IN THE PAST 12 MONTHS (IN 2013 INFLATION-ADJUSTED DOLLARS) FOR THE CIVILIAN EMPLOYED POPULATION 16 YEARS AND OVER

2013 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Versions of this table are available for the following years: 2013

2012

2005

Subject	Alaska											
	Total		Male		Female		Median earnings (dollars)		Median earnings (dollars) for male		Median earnings (dollars) for female	
	Estimate	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error
Civilian employed population 16 years and over	352,822	+/-5,552	54.0%	+/-0.7	46.0%	+/-0.7	40,635	+/-535	47,341	+/-2,215	35,060	+/-1,51
Agriculture, forestry, fishing and hunting, and mining:	22,040	+/-2,397	84.5%	+/-2.9	15.5%	+/-2.9	72,396	+/-7,181	79,187	+/-5,857	42,374	+/-8,76
Agriculture, forestry, fishing and hunting	7,110	+/-1,186	80.9%	+/-4.5	19.1%	+/-4.5	41,446	+/-7,214	47,546	+/-17,817	34,167	+/-10,64
Mining, quarrying, and oil and gas extraction	14,930	+/-2,005	86.2%	+/-4.1	13.8%	+/-4.1	81,406	+/-8,232	86,576	+/-6,795	51,932	+/-9,51
Construction	26,590	+/-2,580	86.6%	+/-3.6	13.4%	+/-3.6	51,183	+/-4,421	52,329	+/-11,335	44,200	+/-14,67
Manufacturing	13,174	+/-1,880	76.0%	+/-6.1	24.0%	+/-6.1	30,241	+/-7,571	35,732	+/-12,620	21,320	+/-7,31
Wholesale trade	6,687	+/-1,413	69.6%	+/-8.1	30.4%	+/-8.1	46,335	+/-9,530	50,719	+/-11,709	35,794	+/-17,50
Retail trade	40,145	+/-3,583	51.8%	+/-3.8	48.2%	+/-3.8	25,419	+/-1,925	28,640	+/-4,566	23,058	+/-2,07
Transportation and warehousing, and utilities:	27,869	+/-2,479	73.0%	+/-3.9	27.0%	+/-3.9	46,485	+/-6,547	51,530	+/-2,615	31,511	+/-8,75
Transportation and warehousing	24,240	+/-2,465	71.5%	+/-4.2	28.5%	+/-4.2	41,882	+/-3,895	49,876	+/-3,122	30,358	+/-8,00
Utilities	3,629	+/-702	82.8%	+/-8.2	17.2%	+/-8.2	64,405	+/-8,908	72,180	+/-21,808	51,647	+/-12,83

Explanation of Symbols:

An *** entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both

of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An "** entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate. An "*** entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

In data year 2013, there were a series of changes to data collection operations that could have affected some estimates. These changes include the addition of Internet as a mode of data collection, the end of the content portion of Failed Edit Follow-Up interviewing, and the loss of one monthly panel due to the Federal Government shut down in October 2013. For more information, see: User Notes

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2012. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

While the 2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
