

SEX BY AGE (AMERICAN INDIAN AND ALASKA NATIVE ALONE)
Universe: People who are American Indian and Alaska Native alone
2013 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

<p>Versions of this table are available for the following years:</p> <p>2013</p> <p>2012</p> <p>2011</p> <p>2010</p> <p>2009</p> <p>2008</p> <p>2007</p> <p>2006</p> <p>2005</p>	1 - 31 of 31	Alaska	
		Estimate	Margin of Error
		Total:	105,310 +/-3,347
		Male:	53,039 +/-2,343
		Under 5 years	4,852 +/-425
		5 to 9 years	5,109 +/-764
		10 to 14 years	4,405 +/-649
		15 to 17 years	2,731 +/-588
		18 and 19 years	2,018 +/-628
		20 to 24 years	5,182 +/-604
		25 to 29 years	4,285 +/-546
		30 to 34 years	3,650 +/-608
		35 to 44 years	5,935 +/-758
		45 to 54 years	6,378 +/-705
		55 to 64 years	4,886 +/-507
		65 to 74 years	2,202 +/-424
		75 to 84 years	1,240 +/-201
		85 years and over	166 +/-82
		Female:	52,271 +/-1,869
		Under 5 years	4,590 +/-600
		5 to 9 years	4,723 +/-892
		10 to 14 years	4,424 +/-774
		15 to 17 years	2,502 +/-450
		18 and 19 years	1,265 +/-328
		20 to 24 years	4,468 +/-749
		25 to 29 years	4,852 +/-566
		30 to 34 years	3,272 +/-586
		35 to 44 years	4,767 +/-590
		45 to 54 years	6,974 +/-657
		55 to 64 years	5,536 +/-496
		65 to 74 years	2,948 +/-532
		75 to 84 years	1,707 +/-376
		85 years and over	243 +/-97

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

In data year 2013, there were a series of changes to data collection operations that could have affected some estimates. These changes include the addition of Internet as a mode of data collection, the end of the content portion of Failed Edit Follow-Up interviewing, and the loss of one monthly panel due to the Federal Government shut down in October 2013. For more information, see: [User Notes](#)

While the 2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.
