

SEX BY AGE BY EDUCATIONAL ATTAINMENT FOR THE POPULATION 18 YEARS AND OVER
Universe: Population 18 years and over
2013 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

2013
2012
2011
2010
2009
2008
2007
2006
2005

	Alaska	
	Estimate	Margin of Error
1 - Total:	546,766	+/-825
83 of 83 Male:	288,959	+/-1,213
18 to 24 years:	47,224	+/-1,412
Less than 9th grade	331	+/-285
9th to 12th grade, no diploma	9,133	+/-1,819
High school graduate (includes equivalency)	18,418	+/-1,598
Some college, no degree	17,091	+/-1,937
Associate's degree	1,039	+/-558
Bachelor's degree	1,163	+/-462
Graduate or professional degree	49	+/-67
25 to 34 years:	61,397	+/-1,376
Less than 9th grade	1,173	+/-633
9th to 12th grade, no diploma	4,026	+/-909
High school graduate (includes equivalency)	19,599	+/-1,812
Some college, no degree	19,336	+/-2,150
Associate's degree	4,329	+/-1,122
Bachelor's degree	9,371	+/-1,339
Graduate or professional degree	3,563	+/-1,119
35 to 44 years:	47,185	+/-1,629
Less than 9th grade	680	+/-381
9th to 12th grade, no diploma	1,729	+/-558
High school graduate (includes equivalency)	16,884	+/-1,744
Some college, no degree	12,330	+/-1,333
Associate's degree	3,490	+/-926
Bachelor's degree	8,194	+/-1,185
Graduate or professional degree	3,878	+/-955
45 to 64 years:	100,490	+/-1,626
Less than 9th grade	2,121	+/-805
9th to 12th grade, no diploma	6,058	+/-1,087
High school graduate (includes equivalency)	30,862	+/-2,339
Some college, no degree	27,919	+/-1,854
Associate's degree	7,892	+/-1,309
Bachelor's degree	16,545	+/-2,081
Graduate or professional degree	9,093	+/-1,103
65 years and over:	32,663	+/-805
Less than 9th grade	2,273	+/-539
9th to 12th grade, no diploma	2,812	+/-898
High school graduate (includes equivalency)	8,592	+/-1,134
Some college, no degree	7,213	+/-1,146
Associate's degree	1,611	+/-519
Bachelor's degree	4,731	+/-1,048
Graduate or professional degree	5,431	+/-793
Female:	257,807	+/-888
18 to 24 years:	36,883	+/-1,216
Less than 9th grade	920	+/-677
9th to 12th grade, no diploma	6,608	+/-1,284
High school graduate (includes equivalency)	11,341	+/-1,698
Some college, no degree	13,804	+/-1,642
Associate's degree	1,337	+/-939
Bachelor's degree	2,794	+/-978
Graduate or professional degree	79	+/-90
25 to 34 years:	52,611	+/-1,291
Less than 9th grade	671	+/-506
9th to 12th grade, no diploma	2,662	+/-771
High school graduate (includes equivalency)	12,188	+/-1,562
Some college, no degree	14,905	+/-1,604
Associate's degree	4,357	+/-962
Bachelor's degree	13,757	+/-1,591

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

In data year 2013, there were a series of changes to data collection operations that could have affected some estimates. These changes include the addition of Internet as a mode of data collection, the end of the content portion of Failed Edit Follow-Up interviewing, and the loss of one monthly panel due to the Federal Government shut down in October 2013. For more information, see: [User Notes](#)

While the 2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
