

POVERTY STATUS IN THE PAST 12 MONTHS BY SEX BY AGE (AMERICAN INDIAN AND ALASKA NATIVE ALONE)
Universe: American Indian and Alaska Native alone population for whom poverty status is determined
2013 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

2013

	Alaska	
	Estimate	Margin of Error
Total:	101,885	+/-3,309
Income in the past 12 months below poverty level:	25,429	+/-2,396
Male:	12,658	+/-1,472
Under 5 years	1,650	+/-341
5 years	369	+/-150
6 to 11 years	1,562	+/-245
12 to 14 years	634	+/-149
15 years	243	+/-116
16 and 17 years	241	+/-82
18 to 24 years	1,788	+/-530
25 to 34 years	1,845	+/-650
35 to 44 years	986	+/-288
45 to 54 years	1,608	+/-428
55 to 64 years	1,243	+/-335
65 to 74 years	314	+/-150
75 years and over	175	+/-143
Female:	12,771	+/-1,376
Under 5 years	1,550	+/-318
5 years	192	+/-69
6 to 11 years	1,625	+/-409
12 to 14 years	491	+/-185
15 years	216	+/-101
16 and 17 years	328	+/-133
18 to 24 years	1,549	+/-328
25 to 34 years	2,475	+/-582
35 to 44 years	1,003	+/-312
45 to 54 years	1,752	+/-415
55 to 64 years	1,132	+/-339
65 to 74 years	244	+/-104
75 years and over	214	+/-111
Income in the past 12 months at or above poverty level:	76,456	+/-3,446
Male:	38,031	+/-2,113
Under 5 years	3,032	+/-413
5 years	519	+/-226
6 to 11 years	4,104	+/-800
12 to 14 years	2,025	+/-526
15 years	866	+/-300
16 and 17 years	1,367	+/-391
18 to 24 years	5,063	+/-660
25 to 34 years	5,196	+/-539
35 to 44 years	4,779	+/-696
45 to 54 years	4,576	+/-630
55 to 64 years	3,532	+/-449
65 to 74 years	1,842	+/-355
75 years and over	1,130	+/-150
Female:	38,425	+/-2,182
Under 5 years	2,817	+/-571
5 years	568	+/-296
6 to 11 years	3,548	+/-754
12 to 14 years	2,199	+/-601
15 years	812	+/-402
16 and 17 years	1,139	+/-264
18 to 24 years	4,026	+/-683
25 to 34 years	5,612	+/-846
35 to 44 years	3,763	+/-617
45 to 54 years	5,174	+/-721
55 to 64 years	4,404	+/-558
65 to 74 years	2,682	+/-521
75 years and over	1,681	+/-379

Explanation of Symbols:

An "*" entry in the margin of error column indicates that either no sample observations or too few sample observations

were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

In data year 2013, there were a series of changes to data collection operations that could have affected some estimates. These changes include the addition of Internet as a mode of data collection, the end of the content portion of Failed Edit Follow-Up interviewing, and the loss of one monthly panel due to the Federal Government shut down in October 2013. For more information, see: [User Notes](#)

While the 2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
