Universe: Households
2013 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

	Alaska	
	Estimate	**Margin of Error**
Total:	246,015	+/-2,720
Income in the past 12 months below poverty level:	19,714	+/-1,929
Family households:	9,814	+/-1,095
Married-couple family:	3,224	+/-535
Householder under 25 years	90	+/-75
Householder 25 to 44 years	1,271	+/-387
Householder 45 to 64 years	1,442	+/-448
Householder 65 years and over	421	+/-227
Other family:	6,590	+/-957
Male householder, no wife present:	1,602	+/-421
Householder under 25 years	282	+/-252
Householder 25 to 44 years	590	+/-214
Householder 45 to 64 years	630	+/-233
Householder 65 years and over	100	+/-53
Female householder, no husband present:	4,988	+/-887
Householder under 25 years	511	+/-225
Householder 25 to 44 years	3,153	+/-709
Householder 45 to 64 years	1,092	+/-387
Householder 65 years and over	232	+/-90
Nonfamily households:	9,900	+/-1,524
Male householder:	5,572	+/-1,142
Householder under 25 years	513	+/-404
Householder 25 to 44 years	1,556	+/-600
Householder 45 to 64 years	2,741	+/-728
Householder 65 years and over	762	+/-482
Female householder:	4,328	+/-886
Householder under 25 years	656	+/-321
Householder 25 to 44 years	582	+/-274
Householder 45 to 64 years	2,483	+/-788
Householder 65 years and over	607	+/-265
Income in the past 12 months at or above poverty level:	226,301	+/-2,844
Family households:	155,617	+/-3,391
Married-couple family:	123,278	+/-3,925
Householder under 25 years	2,764	+/-736
Householder 25 to 44 years	47,869	+/-2,854
Householder 45 to 64 years	54,974	+/-2,452
Householder 65 years and over	17,671	+/-1,212
Other family:	32,339	+/-2,400
Male householder, no wife present:	12,502	+/-1,764
Householder under 25 years	1,073	+/-696
Householder 25 to 44 years	5,716	+/-1,158
Householder 45 to 64 years	4,422	+/-966
Householder 65 years and over	1,291	+/-442
Female householder, no husband present:	19,837	+/-1,610
Householder under 25 years	1,268	+/-697
Householder 25 to 44 years	7,191	+/-1,226
Householder 45 to 64 years	8,535	+/-1,180
Householder 65 years and over	2,843	+/-567
Nonfamily households:	70,684	+/-3,324
Male householder:	39,503	+/-2,617
Householder under 25 years	2,274	+/-911
Householder 25 to 44 years	13,542	+/-1,603
Householder 45 to 64 years	17,449	+/-1,572
Householder 65 years and over	6,238	+/-1,131
Female householder:	31,181	+/-2,077
Householder under 25 years	1,856	+/-596
Householder 25 to 44 years	7,149	+/-1,247
Householder 45 to 64 years	12,565	+/-1,429
Householder 65 years and over	9,611	+/-1,210

Explanation of Symbols:
An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

In data year 2013, there were a series of changes to data collection operations that could have affected some estimates. These changes include the addition of Internet as a mode of data collection, the end of the content portion of Failed Edit Follow-Up interviewing, and the loss of one monthly panel due to the Federal Government shut down in October 2013. For more information, see: User Notes

While the 2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
