

**SEX BY AGE BY AMBULATORY DIFFICULTY**

**Universe: Civilian noninstitutionalized population 5 years and over**  
**2013 American Community Survey 1-Year Estimates**

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

**2013**  
[2012](#)  
[2011](#)  
[2010](#)  
[2009](#)  
[2008](#)

	Alaska	
	Estimate	Margin of Error
Total:	657,543	+/-1,921
Male:	339,435	+/-2,514
5 to 17 years:	69,544	+/-1,700
With an ambulatory difficulty	197	+/-148
No ambulatory difficulty	69,347	+/-1,677
18 to 34 years:	94,246	+/-2,336
With an ambulatory difficulty	763	+/-379
No ambulatory difficulty	93,483	+/-2,331
35 to 64 years:	143,384	+/-1,614
With an ambulatory difficulty	10,534	+/-1,776
No ambulatory difficulty	132,850	+/-2,412
65 to 74 years:	22,353	+/-942
With an ambulatory difficulty	3,173	+/-638
No ambulatory difficulty	19,180	+/-992
75 years and over:	9,908	+/-768
With an ambulatory difficulty	3,098	+/-740
No ambulatory difficulty	6,810	+/-968
Female:	318,108	+/-1,895
5 to 17 years:	63,636	+/-1,571
With an ambulatory difficulty	186	+/-204
No ambulatory difficulty	63,450	+/-1,599
18 to 34 years:	87,427	+/-1,302
With an ambulatory difficulty	1,373	+/-758
No ambulatory difficulty	86,054	+/-1,528
35 to 64 years:	134,719	+/-1,425
With an ambulatory difficulty	10,335	+/-1,444
No ambulatory difficulty	124,384	+/-1,871
65 to 74 years:	20,604	+/-843
With an ambulatory difficulty	3,347	+/-692
No ambulatory difficulty	17,257	+/-1,046
75 years and over:	11,722	+/-617
With an ambulatory difficulty	5,628	+/-810
No ambulatory difficulty	6,094	+/-784

#### Explanation of Symbols:

An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

In data year 2013, there were a series of changes to data collection operations that could have affected some estimates. These changes include the addition of Internet as a mode of data collection, the end of the content portion of Failed Edit Follow-Up interviewing, and the loss of one monthly panel due to the Federal Government shut down in October 2013. For more information, see: [User Notes](#)

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the [Evaluation Report Covering Disability](#).

While the 2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.
