

# TENURE BY HOUSEHOLD TYPE (INCLUDING LIVING ALONE) AND AGE OF HOUSEHOLDER

Universe: Occupied housing units

2013 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

	Alaska	
	Estimate	Margin of Error
Total:	246,015	+/-2,720
Owner occupied:	156,107	+/-3,268
Family households:	116,760	+/-3,363
Married-couple family:	96,316	+/-3,378
Householder 15 to 34 years	12,802	+/-1,707
Householder 35 to 64 years	66,846	+/-2,793
Householder 65 years and over	16,668	+/-1,240
Other family:	20,444	+/-1,824
Male householder, no wife present:	7,708	+/-1,211
Householder 15 to 34 years	1,261	+/-425
Householder 35 to 64 years	5,190	+/-940
Householder 65 years and over	1,257	+/-444
Female householder, no husband present:	12,736	+/-1,187
Householder 15 to 34 years	1,493	+/-418
Householder 35 to 64 years	8,445	+/-1,113
Householder 65 years and over	2,798	+/-544
Nonfamily households:	39,347	+/-2,684
Householder living alone:	32,198	+/-2,491
Householder 15 to 34 years	2,256	+/-818
Householder 35 to 64 years	19,214	+/-1,880
Householder 65 years and over	10,728	+/-1,287
Householder not living alone:	7,149	+/-980
Householder 15 to 34 years	1,460	+/-534
Householder 35 to 64 years	4,426	+/-821
Householder 65 years and over	1,263	+/-483
Renter occupied:	89,908	+/-3,375
Family households:	48,671	+/-2,594
Married-couple family:	30,186	+/-2,171
Householder 15 to 34 years	14,276	+/-1,638
Householder 35 to 64 years	14,486	+/-1,445
Householder 65 years and over	1,424	+/-555
Other family:	18,485	+/-1,892
Male householder, no wife present:	6,396	+/-1,074
Householder 15 to 34 years	3,536	+/-846
Householder 35 to 64 years	2,726	+/-731
Householder 65 years and over	134	+/-94
Female householder, no husband present:	12,089	+/-1,625
Householder 15 to 34 years	5,403	+/-1,118
Householder 35 to 64 years	6,409	+/-1,157
Householder 65 years and over	277	+/-222
Nonfamily households:	41,237	+/-3,000
Householder living alone:	30,602	+/-2,490
Householder 15 to 34 years	7,740	+/-1,110
Householder 35 to 64 years	17,840	+/-2,005
Householder 65 years and over	5,022	+/-1,082
Householder not living alone:	10,635	+/-1,872
Householder 15 to 34 years	6,609	+/-1,479
Householder 35 to 64 years	3,821	+/-1,074
Householder 65 years and over	205	+/-160

Explanation of Symbols:

An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

In data year 2013, there were a series of changes to data collection operations that could have affected some estimates. These changes include the addition of Internet as a mode of data collection, the end of the content portion of Failed Edit Follow-Up interviewing, and the loss of one monthly panel due to the Federal Government shut down in October 2013. For more information, see: [User Notes](#)

While the 2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
