B27004

EMPLOYER-BASED HEALTH INSURANCE BY SEX BY AGE
Universe: Civilian noninstitutionalized population
2013 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

	Alaska	
	Estimate	**Margin of Error**
Total:	712,248	+/-1,963
Male:	366,864	+/-2,541
Under 6 years:	32,520	+/-1,140
With employer-based health insurance	14,402	+/-1,300
No employer-based health insurance	18,118	+/-1,622
6 to 17 years:	64,453	+/-1,770
With employer-based health insurance	33,553	+/-2,595
No employer-based health insurance	30,900	+/-2,509
18 to 24 years:	41,124	+/-1,698
With employer-based health insurance	21,863	+/-2,052
No employer-based health insurance	19,261	+/-1,546
25 to 34 years:	53,122	+/-1,828
With employer-based health insurance	28,909	+/-2,440
No employer-based health insurance	24,213	+/-2,272
35 to 44 years:	44,886	+/-1,749
With employer-based health insurance	26,660	+/-2,211
No employer-based health insurance	18,226	+/-2,201
45 to 54 years:	50,630	+/-1,328
With employer-based health insurance	32,789	+/-1,600
No employer-based health insurance	17,841	+/-1,527
55 to 64 years:	47,868	+/-960
With employer-based health insurance	31,100	+/-1,561
No employer-based health insurance	16,768	+/-1,395
65 to 74 years:	22,353	+/-942
With employer-based health insurance	13,440	+/-1,140
No employer-based health insurance	8,913	+/-1,218
75 years and over:	9,908	+/-768
With employer-based health insurance	4,259	+/-904
No employer-based health insurance	5,649	+/-909
Female:	345,384	+/-2,157
Under 6 years:	32,990	+/-1,529
With employer-based health insurance	12,750	+/-1,677
No employer-based health insurance	20,240	+/-1,838
6 to 17 years:	57,922	+/-1,803
With employer-based health insurance	28,916	+/-2,472
No employer-based health insurance	29,006	+/-2,260
18 to 24 years:	36,049	+/-1,261
With employer-based health insurance	17,944	+/-1,560
No employer-based health insurance	18,105	+/-1,760
25 to 34 years:	51,378	+/-1,318
With employer-based health insurance	27,044	+/-2,015
No employer-based health insurance	24,334	+/-1,983
35 to 44 years:	42,352	+/-1,227
With employer-based health insurance	26,894	+/-1,843
No employer-based health insurance	15,458	+/-1,755
45 to 54 years:	49,128	+/-1,073
With employer-based health insurance	32,383	+/-1,549
No employer-based health insurance	16,745	+/-1,525
55 to 64 years:	43,239	+/-814
With employer-based health insurance	29,616	+/-1,420
No employer-based health insurance	13,623	+/-1,259
65 to 74 years:	20,604	+/-843
With employer-based health insurance	11,408	+/-1,041
No employer-based health insurance	9,196	+/-806
75 years and over:	11,722	+/-617
With employer-based health insurance	4,320	+/-620
No employer-based health insurance	7,402	+/-845

Explanation of Symbols:

An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

In data year 2013, there were a series of changes to data collection operations that could have affected some estimates. These changes include the addition of Internet as a mode of data collection, the end of the content portion of Failed Edit Follow-Up interviewing, and the loss of one monthly panel due to the Federal Government shut down in October 2013. For more information, see: User Notes

The health insurance coverage category names were modified in 2010. See ACS Health Insurance Definitions for a list of the insurance type definitions.

While the 2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
