**Locality** A locality is defined as a distinct population cluster, that is an area defined by population living in neighbouring or contiguous buildings. Such buildings may either:

- (a) form a continuous built-up area with a clearly recognisable street formation; or
  - (b) though not part of such a built-up area, comprise a group of buildings to which a locally recognised place name is uniquely attached; or
  - (c) though not meeting either of the above two criteria, constitute a group of buildings, none of which is separated from its nearest neighbour by more than 200 metres.
- Locality may cross municipal boundaries.
