**Current activity status** 'Current activity status' is the current relationship of a person to economic activity, based on a reference period of one month during November 2011. For a small subset, where available, the activity status was based on the economic activity of the person on the reference date of November 30th, 2011.

In ascribing a single activity status to each person, priority is given to the status of 'employed' in preference to 'unemployed', and to the status of 'unemployed' in preference to 'not economically active'.

In lieu of using the age of 15 years on the reference date as the national minimum age for economic activity, persons who turned 15 years of age in the reference year or younger were defined as being under the minimum age for economic activity, this being the criterion for attending mandatory elementary school at the reference date.
