**Household status** Private households are defined according to the 'household-dwelling' concept. The household-dwelling concept considers all persons living in a housing unit to be members of the same household, such that there is one household per occupied housing unit.

The category 'Persons living in a private household' comprises 'Persons in a family nucleus' and 'Persons not in a family nucleus'. The category 'Persons in a family nucleus' comprises all persons who belong to a private household that contains a family nucleus of which they are a member. 'Persons not in a family nucleus' comprises all persons who either belong to a non-family household or to a family household without being member of any family nucleus in that household.

A non-family household can be a one-person household ('Living alone') or a multiperson household without any family nucleus. The category 'Not living alone' comprises persons that live either in a multiperson household without any family nucleus or in a family household without being member of any family nucleus in that household.

**Educational attainment (highest completed level)** 'Educational attainment' refers to the highest level successfully completed in the educational system of the country where the education was

received. All education which is relevant to the completion of a level is taken into account even if this was provided outside schools and universities.

Persons aged 15 years or over are classified under only one of the categories according to their educational attainment (highest completed level). Persons under the age of 15 years are classified under 'not applicable'.
