ISCED Level 6. Second stage of tertiary education	312	202	110
Not applicable	40	25	15

Family status The family nucleus is defined in the narrow sense, that is as two or more persons who belong to the same household and who are related as married persons, as partners in a consensual union, or as parent and child. Thus a family comprises a couple without children, or a couple with one or more children, or a lone parent with one or more children. This family concept limits relationships between children and adults to direct (first-degree) relationships, that is between parents and children.

Child (son/daughter) refers to a blood, step- or adopted son or daughter (regardless of age or marital status) who has usual residence in the household of at least one of the parents, and who has no partner or own children in the same household. Foster children are not included. A son or daughter who lives with a spouse, with a partner in a consensual union, or with one or more own children, is not considered to be a child. A child who alternates between two households (for instance if his or her parents are divorced) is considered to belong to the household of his/her legal registered guardian.

The term couple shall include married couples, couples in registered partnerships, and couples who live in a consensual union.

Two persons are considered to be partners in a 'consensual union' when they

— belong to the same household, and

— have a marriage-like relationship with each other, and

— are not married with each other.

'Skip-generation households' (households consisting of a grandparent or grandparents and one or more grandchildren, but no parent of those grandchildren) are not included in the definition of a family.

Educational attainment (highest completed level) 'Educational attainment' refers to the highest level successfully completed in the educational system of the country where the education was received. All education which is relevant to the completion of a level is taken into account

even if this was provided outside schools and universities.

Persons aged 15 years or over are classified under only one of the categories according to their educational attainment (highest completed level). Persons under the age of 15 years are classified under 'not applicable'.
