

GEOGRAPHICAL MOBILITY IN THE PAST YEAR BY SEX FOR CURRENT RESIDENCE IN THE UNITED STATES

**Universe: Population 1 year and over in the United States
2014 American Community Survey 1-Year Estimates**

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

This table provides geographical mobility for persons relative to their residence at the time they were surveyed. The characteristics crossed by geographical mobility reflect the current survey year.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

		Alaska	
		Estimate	Margin of Error
1 - 18 of 18	Total:	725,206	+/-1,461
	Male	380,138	+/-2,296
	Female	345,068	+/-2,101
	Same house 1 year ago:	585,916	+/-7,276
	Male	303,760	+/-5,332
	Female	282,156	+/-3,884
	Moved within same county:	79,177	+/-6,423
	Male	42,688	+/-3,927
	Female	36,489	+/-3,215
	Moved from different county within same state:	18,181	+/-3,059
	Male	10,712	+/-1,768
	Female	7,469	+/-1,715
	Moved from different state:	37,842	+/-4,013
	Male	21,058	+/-2,594
	Female	16,784	+/-2,303
	Moved from abroad:	4,090	+/-1,210
	Male	1,920	+/-669
	Female	2,170	+/-799

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.
