

NONFAMILY HOUSEHOLDS BY SEX OF HOUSEHOLDER BY LIVING ALONE BY AGE OF HOUSEHOLDER

**Universe: Nonfamily households
2014 American Community Survey 1-Year Estimates**

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

	Alaska	
	Estimate	Margin of Error
1 - Total:	84,644	+/-3,784
15 - Male householder:	48,430	+/-2,518
15 - Living alone:	35,151	+/-2,375
Householder 15 to 64 years	28,119	+/-2,176
Householder 65 years and over	7,032	+/-1,137
Not living alone:	13,279	+/-1,494
Householder 15 to 64 years	12,150	+/-1,515
Householder 65 years and over	1,129	+/-361
Female householder:	36,214	+/-2,532
Living alone:	28,822	+/-2,166
Householder 15 to 64 years	19,640	+/-1,895
Householder 65 years and over	9,182	+/-1,092
Not living alone:	7,392	+/-1,163
Householder 15 to 64 years	6,473	+/-1,126
Householder 65 years and over	919	+/-367

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.
