

HOUSEHOLD TYPE BY HOUSEHOLD SIZE
Universe: Households
2014 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

2014
2013
2012
2011
2010
2009
2008
2007
2006
2005

	Alaska	
	Estimate	Margin of Error
1 - Total:	249,659	+/-2,978
16 - Family households:	165,015	+/-3,765
16 - 2-person household	66,399	+/-3,168
3-person household	39,329	+/-3,147
4-person household	29,645	+/-2,018
5-person household	15,937	+/-1,728
6-person household	6,402	+/-865
7-or-more person household	7,303	+/-1,126
Nonfamily households:	84,644	+/-3,784
1-person household	63,973	+/-3,219
2-person household	16,431	+/-1,670
3-person household	2,990	+/-895
4-person household	913	+/-435
5-person household	300	+/-228
6-person household	25	+/-42
7-or-more person household	12	+/-18

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.
