

POVERTY STATUS IN THE PAST 12 MONTHS BY AGE (AMERICAN INDIAN AND ALASKA NATIVE ALONE)

Universe: American Indian and Alaska Native alone population for whom poverty status is determined
2014 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

	Alaska	
	Estimate	Margin of Error
1 - Total:	99,138	+/-3,266
17 - Income in the past 12 months below poverty level:	21,916	+/-2,123
17 - Under 6 years	3,762	+/-828
6 to 11 years	3,234	+/-658
12 to 17 years	1,992	+/-329
18 to 59 years	11,357	+/-1,021
60 to 74 years	1,512	+/-401
75 to 84 years	37	+/-37
85 years and over	22	+/-29
Income in the past 12 months at or above poverty level:	77,222	+/-3,493
Under 6 years	6,710	+/-997
6 to 11 years	7,671	+/-1,002
12 to 17 years	8,120	+/-1,031
18 to 59 years	43,769	+/-2,068
60 to 74 years	8,194	+/-589
75 to 84 years	2,351	+/-359
85 years and over	407	+/-128

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.
