

**TENURE BY HOUSEHOLD SIZE**  
**Universe: Occupied housing units**  
**2014 American Community Survey 1-Year Estimates**

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

	Alaska	
	Estimate	Margin of Error
17 - Total:	249,659	+/-2,978
17 - Owner occupied:	156,006	+/-4,250
17 - 1-person household	33,370	+/-2,464
17 - 2-person household	55,649	+/-2,454
17 - 3-person household	25,955	+/-2,423
17 - 4-person household	19,309	+/-1,695
17 - 5-person household	11,975	+/-1,484
17 - 6-person household	4,363	+/-685
17 - 7-or-more person household	5,385	+/-895
17 - Renter occupied:	93,653	+/-4,082
17 - 1-person household	30,603	+/-2,766
17 - 2-person household	27,181	+/-2,679
17 - 3-person household	16,364	+/-1,706
17 - 4-person household	11,249	+/-1,760
17 - 5-person household	4,262	+/-897
17 - 6-person household	2,064	+/-488
17 - 7-or-more person household	1,930	+/-576

**Explanation of Symbols:**

An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.
