Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and ion section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology

	Alaska	
	Estimate	Margin of Erro
Total:	711,541	+/-1,61
Male:	363,589	+/-2,58
Under 6 years:	32,423	+/-1,37
With employer-based health insurance	13,299	+/-1,54
No employer-based health insurance	19,124	+/-1,52
6 to 17 years:	62,233	+/-1,86
With employer-based health insurance	29,020	+/-2,20
No employer-based health insurance	33,213	+/-2,29
18 to 24 years:	40,465	+/-1,85
With employer-based health insurance	20,796	+/-2,17
No employer-based health insurance	19,669	+/-2,00
25 to 34 years:	54,358	+/-1,88
With employer-based health insurance	28,190	+/-2,39
No employer-based health insurance	26,168	+/-2,25
35 to 44 years:	44,478	+/-1,41
With employer-based health insurance	27,119	+/-1,76
No employer-based health insurance	17,359	+/-1,71
45 to 54 years:	48,114	+/-1,21
With employer-based health insurance	29,377	+/-1,71
No employer-based health insurance	18,737	+/-1,47
55 to 64 years:	47,618	+/-1,02
With employer-based health insurance	31,553	+/-1,75
No employer-based health insurance	16,065	+/-1,48
65 to 74 years:	24,071	+/-84
With employer-based health insurance	11,859	+/-1,05
No employer-based health insurance	12,212	+/-1,19
75 years and over:	9,829	+/-79
With employer-based health insurance	4,227	+/-60
No employer-based health insurance	5,602	+/-84
Female:	347,952	+/-2,10
Under 6 years:	31,460	+/-2,10
With employer-based health insurance	13,208	+/-1,47

Explanation of Symbols:

An *** entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An *-* entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot

be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An 1- following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An 1-th following a median estimate means the median falls in the upper interval of an open-ended distribution.

An 1-th following a median estimate means the median falls in the upper interval of an open-ended distribution.

An 1-th following a median estimate means the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An 1-th following a median estimate means the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An 1-th following a median estimate means the median falls in the lowest interval of an open-ended distribution. A statistical test is not appropriate.

An 1-th following a median estimate means the median falls in the lowest interval of an open-ended distribution. A statistical test is not appropriate.

An 1-th following a median estimate means the median falls in the lowest interval of an open-ended distribution. A statistical test is not appropriate.

An 1-th following a median estimate means the median falls in the lowest interval of an open-ended distribution. A statistical test is not appropriate.

An 1-th following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An 1-th following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An 1-th following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An 1-th following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An 1-th following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An 1-th following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An 1-th following a median estimate means the median falls in the lowe
