## Footnotes:

1. Source: Aboriginal Peoples Survey 2012.
2. Excludes persons who were attending high school (grades 7 to 12 or equivalent) at the time of the survey.
3. The Inuit population includes persons who reported being "Inuk (Inuit)" in the Aboriginal Peoples Survey either as their only Aboriginal identity or as part of a multiple identity including "Inuk (Inuit)" and "First Nations" and/or "Métis".
4. Inuit Nunangat is the homeland of Inuit of Canada. It includes communities in Nunatsiavut (Northern coastal Labrador), Nunavik (Northern Quebec), the territory of Nunavut and the Inuvialuit region (Northwest Territories). These regions collectively encompass the area traditionally occupied by Inuit in Canada.
5. Excludes persons living on Indian reserves or settlements.
6. Proxy reporting was used in the 2012 Aboriginal Peoples Survey for nearly half of youth aged 15 to 17 years and for adults in certain specific situations (for example when the selected adult was not able to answer for health related reasons, due to a language barrier, or because the selected respondent was going to be away from home for the duration of the survey.)
7. Includes General Educational Development (GED) and Adult Basic Education (ABE).
8. "Not specified" categories consist of item non-response ("Refusal", "Don't know", and "Not stated").
9. Includes persons aged 15 to 44 who indicated that they were "home schooled" because they were not asked any follow-up questions on level of educational attainment.
10. Postsecondary education consists of any education above the high school level that could be counted towards a certificate, diploma or degree from an educational institution such as a university, a college, CEGEP or other non-university institution, or a trade school. Persons whose postsecondary education consists only of a college, CEGEP, or other non-university certificate or diploma program of less than 3 months are not considered to have any postsecondary education.
11. Bootstrapping techniques were used to produce the coefficient of variation (CV) and 95% confidence intervals (CIs).
12. Data with a coefficient of variation (CV) from 16.6% to 33.3% are identified by an (E) and should be interpreted with caution.
13. Data with a coefficient of variation (CV) greater than 33.3% were suppressed (F) due to extreme sampling variability.
