

PLACE OF BIRTH BY SEX IN THE UNITED STATES
Universe: Total population in the United States
2014 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

2014
2013
2012
2011

2009
2008
2007
2006
2005

		Alaska	
		Estimate	Margin of Error
1 - 15 of 15	Total:	736,732	*****
	Male	385,582	+/-1,999
	Female	351,150	+/-1,999
	Born in state of residence:	304,277	+/-7,422
	Male	157,379	+/-4,954
	Female	146,898	+/-3,931
	Born in other state in the United States:	359,770	+/-6,431
	Male	192,327	+/-4,830
	Female	167,443	+/-3,335
	Native; born outside the United States:	18,013	+/-2,410
	Male	8,602	+/-1,527
	Female	9,411	+/-1,647
	Foreign born:	54,672	+/-3,978
	Male	27,274	+/-2,378
	Female	27,398	+/-2,508

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.
