

HOUSEHOLD SIZE BY NUMBER OF WORKERS IN HOUSEHOLD
Universe: Households
2014 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

2014
2013
2012
2011
2010
2009
2008
2007
2006
2005

1 - 22 of 22		Alaska	
		Estimate	Margin of Error
	Total:	249,659	+/-2,978
	No workers	50,150	+/-2,774
	1 worker	105,325	+/-4,268
	2 workers	77,282	+/-3,300
	3 or more workers	16,902	+/-2,000
	1-person household:	63,973	+/-3,219
	No workers	24,702	+/-2,016
	1 worker	39,271	+/-2,962
	2-person household:	82,830	+/-2,860
	No workers	16,869	+/-1,742
	1 worker	31,382	+/-2,376
	2 workers	34,579	+/-2,491
	3-person household:	42,319	+/-3,008
	No workers	4,054	+/-913
	1 worker	15,135	+/-1,708
	2 workers	17,019	+/-1,814
	3 workers	6,111	+/-1,215
	4-or-more-person household:	60,537	+/-2,754
	No workers	4,525	+/-1,001
	1 worker	19,537	+/-1,961
	2 workers	25,684	+/-1,858
	3 or more workers	10,791	+/-1,426

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.
