

**OWN CHILDREN UNDER 18 YEARS BY FAMILY TYPE AND AGE**  
**Universe: Own children under 18 years**  
**2014 American Community Survey 1-Year Estimates**

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

1 - 20 of 20	Alaska	
	Estimate	Margin of Error
	Total:	167,179 +/-2,435
	In married-couple families:	120,633 +/-4,961
	Under 3 years	20,459 +/-1,848
	3 and 4 years	13,633 +/-1,660
	5 years	6,971 +/-1,070
	6 to 11 years	40,884 +/-2,687
	12 to 17 years	38,686 +/-2,532
	In other families:	46,546 +/-4,482
	Male householder, no wife present:	16,328 +/-3,046
	Under 3 years	2,929 +/-858
	3 and 4 years	2,347 +/-801
	5 years	1,021 +/-506
	6 to 11 years	5,276 +/-1,448
	12 to 17 years	4,755 +/-1,183
	Female householder, no husband present:	30,218 +/-3,312
	Under 3 years	4,556 +/-1,066
	3 and 4 years	3,176 +/-849
	5 years	1,738 +/-613
	6 to 11 years	10,723 +/-1,914
	12 to 17 years	10,025 +/-1,460

Versions of this table are available for the following years:

**Explanation of Symbols:**

An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.
