

**WOMEN 15 TO 50 YEARS WHO HAD A BIRTH IN THE PAST 12 MONTHS BY MARITAL STATUS AND AGE**

**Universe: Women 15 to 50 years  
2014 American Community Survey 1-Year Estimates**

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

	Alaska	
	Estimate	Margin of Error
Total:	175,566	+/-2,091
Women who had a birth in the past 12 months:	11,703	+/-1,683
Now married (including separated and spouse absent):	8,861	+/-1,436
15 to 19 years old	385	+/-371
20 to 34 years old	6,742	+/-1,277
35 to 50 years old	1,734	+/-612
Unmarried (never married, widowed, and divorced):	2,842	+/-738
15 to 19 years old	394	+/-394
20 to 34 years old	2,388	+/-600
35 to 50 years old	60	+/-33
Women who did not have a birth in the past 12 months:	163,863	+/-2,186
Now married (including separated and spouse absent):	73,430	+/-2,880
15 to 19 years old	605	+/-398
20 to 34 years old	25,400	+/-2,411
35 to 50 years old	47,425	+/-2,207
Unmarried (never married, widowed, and divorced):	90,433	+/-3,278
15 to 19 years old	23,107	+/-1,473
20 to 34 years old	44,795	+/-2,559
35 to 50 years old	22,531	+/-1,976

**Explanation of Symbols:**

An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.
