

WOMEN 15 TO 50 YEARS WHO HAD A BIRTH IN THE PAST 12 MONTHS BY AGE
Universe: Women 15 to 50 years
2014 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

2014
2013
2012
2011
2010

	Alaska	
	Estimate	Margin of Error
17 - 17		
Total:	175,566	+/-2,091
Women who had a birth in the past 12 months:	11,703	+/-1,683
15 to 19 years old	779	+/-542
20 to 24 years old	2,616	+/-678
25 to 29 years old	3,447	+/-870
30 to 34 years old	3,067	+/-745
35 to 39 years old	1,439	+/-609
40 to 44 years old	308	+/-220
45 to 50 years old	47	+/-57
Women who did not have a birth in the past 12 months:	163,863	+/-2,186
15 to 19 years old	23,712	+/-1,358
20 to 24 years old	24,309	+/-1,528
25 to 29 years old	23,174	+/-1,053
30 to 34 years old	22,712	+/-1,115
35 to 39 years old	19,809	+/-1,641
40 to 44 years old	23,182	+/-1,770
45 to 50 years old	26,965	+/-1,456

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.
