

SEX BY CLASS OF WORKER FOR THE CIVILIAN EMPLOYED POPULATION 16 YEARS AND OVER
Universe: Civilian employed population 16 years and over
2014 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

	Alaska	
	Estimate	Margin of Error
Total:	352,531	+/-5,376
Male:	193,046	+/-3,792
Private for-profit wage and salary workers:	122,984	+/-4,373
Employee of private company workers	114,778	+/-4,374
Self-employed in own incorporated business workers	8,206	+/-1,218
Private not-for-profit wage and salary workers	12,467	+/-1,624
Local government workers	14,063	+/-1,326
State government workers	13,434	+/-1,544
Federal government workers	17,485	+/-2,201
Self-employed in own not incorporated business workers	12,248	+/-1,504
Unpaid family workers	365	+/-396
Female:	159,485	+/-3,660
Private for-profit wage and salary workers:	81,902	+/-3,425
Employee of private company workers	77,101	+/-3,389
Self-employed in own incorporated business workers	4,801	+/-1,080
Private not-for-profit wage and salary workers	22,615	+/-2,099
Local government workers	20,584	+/-2,014
State government workers	15,270	+/-1,964
Federal government workers	8,494	+/-1,307
Self-employed in own not incorporated business workers	10,453	+/-1,321
Unpaid family workers	167	+/-104

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.
