

TENURE BY HOUSEHOLD SIZE BY AGE OF HOUSEHOLDER
Universe: Occupied housing units
2014 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

2009
2008
2007
2006
2005

1 - 23 of 23	Alaska	
	Estimate	Margin of Error
Total:	249,659	+/-2,978
Owner occupied:	156,006	+/-4,250
1-person household:	33,370	+/-2,464
Householder 15 to 54 years	13,418	+/-1,620
Householder 55 to 64 years	8,997	+/-1,131
Householder 65 to 74 years	6,620	+/-1,007
Householder 75 years and over	4,335	+/-795
2-or-more person household:	122,636	+/-3,521
Householder 15 to 54 years	69,767	+/-2,869
Householder 55 to 64 years	29,999	+/-1,797
Householder 65 to 74 years	16,468	+/-1,200
Householder 75 years and over	6,402	+/-810
Renter occupied:	93,653	+/-4,082
1-person household:	30,603	+/-2,766
Householder 15 to 54 years	18,540	+/-2,119
Householder 55 to 64 years	6,804	+/-1,196
Householder 65 to 74 years	3,044	+/-939
Householder 75 years and over	2,215	+/-489
2-or-more person household:	63,050	+/-3,733
Householder 15 to 54 years	55,252	+/-3,451
Householder 55 to 64 years	5,886	+/-1,043
Householder 65 to 74 years	950	+/-330
Householder 75 years and over	962	+/-509

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.
