

SEX BY EDUCATIONAL ATTAINMENT FOR THE POPULATION 25 YEARS AND OVER
Universe: Population 25 years and over
2014 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

		Alaska	
		Estimate	Margin of Error
1 - 17 of 17	Total:	465,149	+/-2,124
	Male:	242,227	+/-1,823
	Less than 9th grade	5,60s	+/-899
	9th to 12th grade, no diploma	11,774	+/-1,261
	High school graduate (includes equivalency)	75,131	+/-3,280
	Some college, no degree	69,771	+/-3,380
	Associate's degree	19,426	+/-2,090
	Bachelor's degree	39,715	+/-2,585
	Graduate or professional degree	20,807	+/-2,177
	Female:	222,922	+/-1,412
	Less than 9th grade	7,022	+/-1,025
	9th to 12th grade, no diploma	8,854	+/-1,470
	High school graduate (includes equivalency)	56,856	+/-3,166
	Some college, no degree	61,788	+/-3,603
	Associate's degree	18,660	+/-1,791
	Bachelor's degree	45,919	+/-2,539
	Graduate or professional degree	23,823	+/-2,348

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.
