

**SEX BY AGE BY EMPLOYMENT STATUS FOR THE POPULATION 16 YEARS AND OVER  
(AMERICAN INDIAN AND ALASKA NATIVE ALONE)  
Universe: American Indian and Alaska Native alone population 16 years and over  
2014 American Community Survey 1-Year Estimates**

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

	Alaska	
	Estimate	Margin of Error
Total:	74,189	+/-2,369
Male:	36,542	+/-1,331
16 to 64 years:	32,729	+/-1,346
In labor force:	20,190	+/-1,270
In Armed Forces	0	+/-145
Civilian:	20,190	+/-1,270
Employed	15,608	+/-1,211
Unemployed	4,582	+/-780
Not in labor force	12,539	+/-1,337
65 years and over:	3,813	+/-420
In labor force:	804	+/-252
Employed	695	+/-232
Unemployed	109	+/-112
Not in labor force	3,009	+/-388
Female:	37,647	+/-1,796
16 to 64 years:	33,057	+/-1,723
In labor force:	20,886	+/-1,600
In Armed Forces	11	+/-20
Civilian:	20,875	+/-1,603
Employed	17,395	+/-1,462
Unemployed	3,480	+/-923
Not in labor force	12,171	+/-1,061
65 years and over:	4,590	+/-331
In labor force:	664	+/-210
Employed	664	+/-210
Unemployed	0	+/-145
Not in labor force	3,926	+/-402

**Explanation of Symbols:**

An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.
