Average household total income (\$)	85,554	(symbol: three dots)	(symbol: three
Median after-tax household income (\$)	68,109	(symbol: three dots)	(symbol: three
Average after-tax household income (\$)	74,780	(symbol: three dots)	(symbol: three

### **Footnotes**

113 Household total income - The total income of a household is the sum of the total incomes of all members of that household.

Total income - Total income refers to monetary receipts from certain sources, before income taxes and deductions, during calendar year 2010. It includes employment income from wages, salaries, tips, commissions and net income from self-employment (for both unincorporated farm and non-farm activities); income from government sources, such as social assistance, child benefits, employment insurance, old age security pension, Canada or Quebec pension plan benefits and disability income; income from employer and personal pension sources, such as private pensions and payments from annuities and RRIFs; income from investment sources, such as dividends and interest on bonds, accounts, GICs and mutual funds; and other regular cash income, such as child support payments received, spousal support payments (alimony) received and scholarships. The monetary receipts included are those that tend to be of a regular and recurring nature. It excludes one-time receipts, such as lottery winnings, gambling winnings, cash inheritances, lump sum insurance settlements, capital gains and RRSP withdrawals. Capital gains are excluded because they are not by their nature regular and recurring. It is further assumed that they are less likely to be fully spent in the period in which they are received, unlike income that is regular and recurring. Also excluded are employer's contributions to registered pension plans, Canada and Quebec pension plans, and employment insurance. Finally, voluntary interhousehold transfers, imputed rent, goods and services produced for barter, and goods produced for own consumption are excluded from this total income definition.

Household, private - Refers to a person or a group of persons (other than foreign residents) who occupy the same private dwelling and do not have a usual place of residence elsewhere in Canada. Household members who are temporarily absent on May 10, 2011 (e.g., temporarily residing elsewhere) are considered as part of their usual household. Every person is a member of one and only one household.

An Aboriginal household is either a non-family household in which at least 50 per cent of household members self-identified as Aboriginal people, or a family household that meets at least one of two criteria: (a) at least one married spouse, common-law partner, or lone parent self-identified as an Aboriginal person; or (b) at least 50 per cent of household members self-identified as Aboriginal people. An Aboriginal person is anybody identifying as an Aboriginal person (Question 18), a member of an Indian Band/First Nation (Question 21), or a Treaty Indian or Registered Indian (Question 20).

114 After-tax income of households - The after-tax income of a household is the sum of the after-tax incomes of all members of that household.

After-tax income - Refers to total income from all sources minus federal, provincial and territorial income taxes paid for 2010.

Household, private - Refers to a person or a group of persons (other than foreign residents) who occupy the same private dwelling and do not have a usual place of residence elsewhere in Canada. Household members who are temporarily absent on May 10, 2011 (e.g., temporarily residing elsewhere) are considered as part of their usual household. Every person is a member of one and only one household.

An Aboriginal household is either a non-family household in which at least 50 per cent of household members self-identified as Aboriginal people, or a family household that meets at least one of two criteria: (a) at least one married spouse, common-law partner, or lone parent self-identified as an Aboriginal person; or (b) at least 50 per cent of household members self-identified as Aboriginal people. An Aboriginal person is anybody identifying as an Aboriginal person (Question 18), a member of an Indian Band/First Nation (Question 21), or a Treaty Indian or Registered Indian (Question 20).

15 Household total income - The total income of a household is the sum of the total incomes of all members of that household.

After-tax income of households - The after-tax income of a household is the sum of the after-tax incomes of all members of that household.

Total income - Total of income from all sources, including employment income, income from government programs, pension income, investment income and any other money income.

After-tax income - Refers to total income from all sources minus federal, provincial and territorial income taxes paid for 2010.

Median income of households - The median income of a specified group of households is that amount which divides their income size distribution, ranked by size of income, into two halves. That is, the incomes of the first half of the households are below the median, while those of the second half are above the median. Median incomes of households are normally calculated for all units in the specified group, whether or not they reported income.

Average income of households - Average income of households refers to the weighted mean total income of households in 2010. Average income is calculated from unrounded data by dividing the aggregate income of a specified group of households (for example, two person households) by the number of households in that specific group, whether or not they reported income.

The above concept and procedures also apply in the calculation of these statistics on the after-tax income of households.

Household, private - Refers to a person or a group of persons (other than foreign residents) who occupy the same private dwelling and do not have a usual place of residence elsewhere in Canada. Household members who are temporarily absent on May 10, 2011 (e.g., temporarily residing elsewhere) are considered as part of their usual household. Every person is a member of one and only one household.

An Aboriginal household is either a non-family household in which at least 50 per cent of household members self-identified as Aboriginal people, or a family household that meets at least one of two criteria: (a) at least one married spouse, common-law partner, or lone parent self-identified as an Aboriginal person; or (b) at least 50 per cent of household members self-identified as Aboriginal people. An Aboriginal person is anybody identifying as an Aboriginal person (Question 18), a member of an Indian Band/First Nation (Question 21), or a Treaty Indian or Registered Indian (Question 20).

Household size - Refers to the number of usual residents in a private household.
