Distribution of income is published both for total income and income from work. Tax payers are ranked according to income in 10 equally large groups, from those who have the lowest income to the highest one. Deciles show the rate of tax payers who have lower or equal income than the given amount. Along with deciles there are also shown 95% and 99% percentiles. For instance in the year 2014 99% percentile of income from work from everyone 18,400 thousand ISK a year which means that 99% of tax payers had lower or equal amount of 18,400 thousand ISK a year in income from work. Which also means that 1% of tax payers had higher than 18,400 thousand ISK in income from work a year. When referring to distribution of income, only those who have income from the relevant source, are included, others have been excluded.

Mean - conditional: Mean from tax payers who have specific income/taxes

Unit: Number - conditional: Total number of tax payers who have specific income/taxes

Latest update: 20151223

Units: Thousand ISK/Number

Reference period: 1990-2014
