

EARNINGS IN THE PAST 12 MONTHS (IN 2015 INFLATION-ADJUSTED DOLLARS)
2015 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years: 2015 2014 2013 2012 2011 2010 2009 2008 2007 2006 2005	1 - 21 of 21	Alaska						
		Total		Male		Female		
		Estimate	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error	
		Subject						
		Population 16 years and over with earnings	428,304	+/-4,256	240,834	+/-3,087	187,470	+/-2,840
		Median earnings (dollars)	35,552	+/-770	41,430	+/-777	29,648	+/-1,071
		Full-time, year-round workers with earnings	244,344	+/-5,443	145,295	+/-3,420	99,049	+/-3,529
		\$1 to \$9,999 or loss	1.9%	+/-0.5	1.6%	+/-0.6	2.2%	+/-0.7
		\$10,000 to \$14,999	2.4%	+/-0.4	1.5%	+/-0.5	3.7%	+/-0.8
		\$15,000 to \$24,999	10.4%	+/-1.0	10.7%	+/-1.3	10.0%	+/-1.5
		\$25,000 to \$34,999	14.4%	+/-1.1	12.0%	+/-1.5	18.0%	+/-2.0
		\$35,000 to \$49,999	18.7%	+/-1.5	16.4%	+/-1.7	22.0%	+/-2.2
		\$50,000 to \$64,999	16.2%	+/-1.1	15.8%	+/-1.5	16.7%	+/-1.9
		\$65,000 to \$74,999	8.9%	+/-0.8	9.5%	+/-1.2	8.0%	+/-1.3
		\$75,000 to \$99,999	14.1%	+/-1.2	15.1%	+/-1.5	12.7%	+/-1.6
		\$100,000 or more	13.1%	+/-1.0	17.4%	+/-1.5	6.8%	+/-1.1
		Median earnings (dollars)	(X)	(X)	55,752	+/-1,897	43,455	+/-3,765
		Mean earnings (dollars)	62,576	+/-1,853	69,170	+/-2,691	52,903	+/-2,033
		MEDIAN EARNINGS BY EDUCATIONAL ATTAINMENT						
		Population 25 years and over with earnings	41,968	+/-694	51,160	+/-745	34,713	+/-2,557
		Less than high school graduate	21,923	+/-2,102	26,389	+/-4,168	16,073	+/-4,237
		High school graduate (includes equivalency)	33,815	+/-2,823	41,365	+/-2,288	25,312	+/-1,623
		Some college or associate's degree	41,036	+/-754	50,968	+/-1,304	31,797	+/-1,025
		Bachelor's degree	52,885	+/-4,134	64,905	+/-4,481	42,423	+/-6,879
		Graduate or professional degree	70,590	+/-3,614	77,073	+/-5,282	64,785	+/-4,675
		PERCENT IMPUTED						
		Earnings in the past 12 months	19.5%	(X)	(X)	(X)	(X)	(X)

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
