

SEX BY SCHOOL ENROLLMENT BY LEVEL OF SCHOOL BY TYPE OF SCHOOL FOR THE POPULATION 3 YEARS AND OVER
Universe: Population 3 years and over
2015 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

	Alaska	
	Estimate	Margin of Error
Total:	705,529	+/-1,597
Male:	371,819	+/-1,899
Enrolled in school:	96,879	+/-2,913
Enrolled in nursery school, preschool:	5,750	+/-1,105
Public school	3,348	+/-763
Private school	2,402	+/-849
Enrolled in kindergarten:	5,638	+/-1,104
Public school	4,705	+/-984
Private school	933	+/-582
Enrolled in grade 1 to grade 4:	18,815	+/-1,806
Public school	16,415	+/-1,662
Private school	2,400	+/-696
Enrolled in grade 5 to grade 8:	20,399	+/-1,699
Public school	18,619	+/-1,664
Private school	1,780	+/-574
Enrolled in grade 9 to grade 12:	21,925	+/-1,908
Public school	19,913	+/-1,873
Private school	2,012	+/-576
Enrolled in college undergraduate years:	19,690	+/-2,103
Public school	16,039	+/-2,104
Private school	3,651	+/-1,422
Enrolled in graduate or professional school:	4,662	+/-1,085
Public school	3,449	+/-945
Private school	1,213	+/-594
Not enrolled in school	274,940	+/-2,909
Female:	333,710	+/-1,830
Enrolled in school:	93,001	+/-3,013
Enrolled in nursery school, preschool:	5,014	+/-945
Public school	3,380	+/-707
Private school	1,634	+/-535
Enrolled in kindergarten:	4,686	+/-949
Public school	4,335	+/-954
Private school	351	+/-254
Enrolled in grade 1 to grade 4:	18,470	+/-1,548
Public school	16,948	+/-1,723
Private school	1,522	+/-672
Enrolled in grade 5 to grade 8:	17,909	+/-1,548
Public school	16,191	+/-1,471
Private school	1,718	+/-521
Enrolled in grade 9 to grade 12:	19,880	+/-1,346
Public school	18,124	+/-1,460
Private school	1,756	+/-656
Enrolled in college undergraduate years:	20,833	+/-2,264
Public school	17,991	+/-2,145
Private school	2,842	+/-1,023
Enrolled in graduate or professional school:	6,209	+/-1,075
Public school	4,527	+/-984
Private school	1,682	+/-749
Not enrolled in school	240,709	+/-3,016

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
