

SEX BY COLLEGE OR GRADUATE SCHOOL ENROLLMENT BY TYPE OF SCHOOL BY AGE FOR THE POPULATION 15 YEARS AND OVER
Universe: Population 15 years and over
2015 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

	Alaska	
	Estimate	Margin of Error
Total:	582,619	+/-876
Male:	308,121	+/-1,381
Enrolled in public college or graduate school:	19,488	+/-2,314
15 to 17 years	349	+/-288
18 to 24 years	9,464	+/-1,564
25 to 34 years	6,124	+/-1,443
35 years and over	3,551	+/-980
Enrolled in private college or graduate school:	4,864	+/-1,570
15 to 17 years	0	+/-149
18 to 24 years	1,709	+/-1,141
25 to 34 years	1,507	+/-696
35 years and over	1,648	+/-801
Not enrolled in college or graduate school:	283,769	+/-2,776
15 to 17 years	15,173	+/-980
18 to 24 years	37,090	+/-2,029
25 to 34 years	56,302	+/-1,782
35 years and over	175,204	+/-2,114
Female:	274,498	+/-1,421
Enrolled in public college or graduate school:	22,518	+/-2,177
15 to 17 years	279	+/-262
18 to 24 years	9,961	+/-1,402
25 to 34 years	6,925	+/-1,344
35 years and over	5,353	+/-1,092
Enrolled in private college or graduate school:	4,524	+/-1,233
15 to 17 years	0	+/-149
18 to 24 years	781	+/-317
25 to 34 years	1,727	+/-836
35 years and over	2,016	+/-798
Not enrolled in college or graduate school:	247,456	+/-2,823
15 to 17 years	14,777	+/-1,142
18 to 24 years	23,513	+/-1,566
25 to 34 years	46,193	+/-1,582
35 years and over	162,973	+/-1,650

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The category "Not enrolled in college or graduate school" includes those who were not enrolled in school as well as those who were enrolled in levels other than college or graduate school.

While the 2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
