

SEX BY AGE BY EDUCATIONAL ATTAINMENT FOR THE POPULATION 18 YEARS AND OVER
: Population 18 years and over
2015 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

	Alaska	
	Estimate	Margin of Error
1 - 83 of 83		
Total:	552,041	+/-577
Male:	292,599	+/-1,164
18 to 24 years:	48,263	+/-1,444
Less than 9th grade	422	+/-356
9th to 12th grade, no diploma	7,393	+/-1,182
High school graduate (includes equivalency)	18,484	+/-1,703
Some college, no degree	18,353	+/-1,641
Associate's degree	1,512	+/-665
Bachelor's degree	2,030	+/-728
Graduate or professional degree	69	+/-110
25 to 34 years:	63,933	+/-1,423
Less than 9th grade	633	+/-406
9th to 12th grade, no diploma	3,898	+/-790
High school graduate (includes equivalency)	20,211	+/-1,664
Some college, no degree	17,713	+/-1,994
Associate's degree	5,460	+/-1,472
Bachelor's degree	12,746	+/-1,516
Graduate or professional degree	3,272	+/-1,035
35 to 44 years:	47,778	+/-1,509
Less than 9th grade	868	+/-613
9th to 12th grade, no diploma	1,934	+/-595
High school graduate (includes equivalency)	15,328	+/-1,803
Some college, no degree	14,129	+/-1,572
Associate's degree	3,512	+/-697
Bachelor's degree	7,675	+/-991
Graduate or professional degree	4,332	+/-832
45 to 64 years:	97,577	+/-1,548
Less than 9th grade	2,360	+/-811
9th to 12th grade, no diploma	3,967	+/-812
High school graduate (includes equivalency)	29,586	+/-2,186
Some college, no degree	25,694	+/-2,185
Associate's degree	7,537	+/-1,179
Bachelor's degree	17,079	+/-1,768
Graduate or professional degree	11,354	+/-1,370
65 years and over:	35,048	+/-697
Less than 9th grade	2,434	+/-461
9th to 12th grade, no diploma	1,412	+/-362
High school graduate (includes equivalency)	8,547	+/-1,011
Some college, no degree	8,707	+/-1,074
Associate's degree	2,563	+/-803
Bachelor's degree	5,468	+/-884
Graduate or professional degree	5,917	+/-958
Female:	259,442	+/-900
18 to 24 years:	34,255	+/-912
Less than 9th grade	166	+/-135
9th to 12th grade, no diploma	4,446	+/-895
High school graduate (includes equivalency)	12,932	+/-1,293
Some college, no degree	12,134	+/-1,576
Associate's degree	1,883	+/-734
Bachelor's degree	2,446	+/-789
Graduate or professional degree	248	+/-251
25 to 34 years:	54,845	+/-1,464
Less than 9th grade	630	+/-340
9th to 12th grade, no diploma	3,290	+/-1,021
High school graduate (includes equivalency)	12,619	+/-1,376
Some college, no degree	15,645	+/-1,633
Associate's degree	5,011	+/-1,318

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
