

POVERTY STATUS IN THE PAST 12 MONTHS BY SEX BY AGE (AMERICAN INDIAN AND ALASKA NATIVE ALONE)
: American Indian and Alaska Native alone population for whom poverty status is determined
2015 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

1 - 59 of 59	Alaska	
	Estimate	Margin of Error
Total:	98,645	+/-3,273
Income in the past 12 months below poverty level:	23,839	+/-2,190
Male:	11,463	+/-1,246
Under 5 years	1,986	+/-556
5 years	285	+/-84
6 to 11 years	1,430	+/-230
12 to 14 years	620	+/-160
15 years	99	+/-43
16 and 17 years	294	+/-84
18 to 24 years	1,635	+/-452
25 to 34 years	1,647	+/-383
35 to 44 years	1,171	+/-396
45 to 54 years	1,021	+/-258
55 to 64 years	1,036	+/-297
65 to 74 years	161	+/-86
75 years and over	78	+/-41
Female:	12,376	+/-1,262
Under 5 years	1,736	+/-348
5 years	366	+/-154
6 to 11 years	1,666	+/-359
12 to 14 years	559	+/-135
15 years	123	+/-63
16 and 17 years	393	+/-172
18 to 24 years	1,955	+/-478
25 to 34 years	2,075	+/-614
35 to 44 years	1,065	+/-263
45 to 54 years	1,241	+/-285
55 to 64 years	936	+/-257
65 to 74 years	147	+/-82
75 years and over	114	+/-72
Income in the past 12 months at or above poverty level:	74,806	+/-3,014
Male:	37,783	+/-1,987
Under 5 years	2,932	+/-565
5 years	585	+/-189
6 to 11 years	4,261	+/-741
12 to 14 years	1,798	+/-453
15 years	1,035	+/-523
16 and 17 years	1,161	+/-322
18 to 24 years	5,045	+/-1,011
25 to 34 years	5,173	+/-617
35 to 44 years	3,922	+/-706
45 to 54 years	4,584	+/-716
55 to 64 years	4,052	+/-624
65 to 74 years	2,161	+/-288
75 years and over	1,074	+/-220
Female:	37,023	+/-2,131
Under 5 years	2,504	+/-547
5 years	531	+/-253
6 to 11 years	3,973	+/-677
12 to 14 years	1,687	+/-450
15 years	554	+/-199
16 and 17 years	1,736	+/-783
18 to 24 years	3,209	+/-417
25 to 34 years	5,074	+/-652
35 to 44 years	4,855	+/-682
45 to 54 years	4,295	+/-639
55 to 64 years	4,520	+/-652
65 to 74 years	2,850	+/-452
75 years and over	1,235	+/-217

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
