

POVERTY STATUS IN THE PAST 12 MONTHS OF FAMILIES BY HOUSEHOLD TYPE BY NUMBER OF OWN CHILDREN UNDER 18 YEARS

: Families
2015 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

	Alaska	
	Estimate	Margin of Error
Total:	163,800	+/-3,113
Income in the past 12 months below poverty level:	11,530	+/-1,402
Married-couple family:	3,189	+/-607
No own child of the householder	821	+/-284
1 or 2 own children of the householder	940	+/-346
3 or 4 own children of the householder	901	+/-374
5 or more own children of the householder	527	+/-446
Other families:	8,341	+/-1,315
Male householder, no wife present:	2,523	+/-610
No own child of the householder	871	+/-451
1 or 2 own children of the householder	1,105	+/-411
3 or 4 own children of the householder	509	+/-246
5 or more own children of the householder	38	+/-30
Female householder, no husband present:	5,818	+/-1,135
No own child of the householder	759	+/-240
1 or 2 own children of the householder	3,470	+/-893
3 or 4 own children of the householder	1,368	+/-580
5 or more own children of the householder	221	+/-220
Income in the past 12 months at or above poverty level:	152,270	+/-3,239
Married-couple family:	117,159	+/-3,002
No own child of the householder	68,844	+/-2,773
1 or 2 own children of the householder	36,286	+/-2,708
3 or 4 own children of the householder	9,990	+/-1,580
5 or more own children of the householder	2,039	+/-518
Other families:	35,111	+/-2,578
Male householder, no wife present:	12,586	+/-1,379
No own child of the householder	5,164	+/-952
1 or 2 own children of the householder	6,691	+/-1,065
3 or 4 own children of the householder	671	+/-419
5 or more own children of the householder	60	+/-36
Female householder, no husband present:	22,525	+/-2,030
No own child of the householder	9,377	+/-1,327
1 or 2 own children of the householder	11,880	+/-1,781
3 or 4 own children of the householder	969	+/-455
5 or more own children of the householder	299	+/-253

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An 'l' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the
