2015 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

Versions of this table are available for the following years:

2015
[2014](#)
[2013](#)
[2012](#)
[2011](#)
[2010](#)
[2009](#)
[2008](#)

1 33 of 33	Alaska	
	Estimate	Margin of Error
Total:	658,381	+/-1,915
Male:	339,453	+/-2,432
5 to 17 years:	67,990	+/-1,393
With a cognitive difficulty	2,789	+/-729
No cognitive difficulty	65,201	+/-1,640
18 to 34 years:	96,857	+/-2,348
With a cognitive difficulty	4,998	+/-1,064
No cognitive difficulty	91,859	+/-2,341
35 to 64 years:	139,861	+/-1,544
With a cognitive difficulty	4,832	+/-1,069
No cognitive difficulty	135,029	+/-1,791
65 to 74 years:	24,693	+/-715
With a cognitive difficulty	1,125	+/-356
No cognitive difficulty	23,568	+/-817
75 years and over:	10,052	+/-395
With a cognitive difficulty	2,205	+/-722
No cognitive difficulty	7,847	+/-803
Female:	318,928	+/-1,641
5 to 17 years:	63,226	+/-1,063
With a cognitive difficulty	1,740	+/-676
No cognitive difficulty	61,486	+/-1,203
18 to 34 years:	86,551	+/-1,456
With a cognitive difficulty	2,947	+/-936
No cognitive difficulty	83,604	+/-1,874
35 to 64 years:	133,810	+/-1,465
With a cognitive difficulty	5,602	+/-1,217
No cognitive difficulty	128,208	+/-2,040
65 to 74 years:	23,098	+/-936
With a cognitive difficulty	1,564	+/-562
No cognitive difficulty	21,534	+/-966
75 years and over:	12,243	+/-644
With a cognitive difficulty	2,552	+/-620
No cognitive difficulty	9,691	+/-812

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the [Evaluation Report Covering Disability](#).

While the 2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
