

TENURE BY HOUSEHOLD TYPE (INCLUDING LIVING ALONE) AND AGE OF HOUSEHOLDER
Universe: Occupied housing units
2015 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

	Alaska	
	Estimate	Margin of Error
1 -		
49 of		
49		
Total:	250,185	+/-2,685
Owner occupied:	159,922	+/-3,409
Family households:	113,311	+/-2,933
Married-couple family:	91,606	+/-2,651
Householder 15 to 34 years	11,996	+/-1,292
Householder 35 to 64 years	62,216	+/-2,315
Householder 65 years and over	17,394	+/-1,341
Other family:	21,705	+/-1,889
Male householder, no wife present:	8,289	+/-1,234
Householder 15 to 34 years	1,663	+/-630
Householder 35 to 64 years	5,454	+/-1,145
Householder 65 years and over	1,172	+/-388
Female householder, no husband present:	13,416	+/-1,479
Householder 15 to 34 years	1,236	+/-555
Householder 35 to 64 years	9,409	+/-1,286
Householder 65 years and over	2,771	+/-718
Nonfamily households:	46,611	+/-2,726
Householder living alone:	36,811	+/-2,668
Householder 15 to 34 years	3,783	+/-955
Householder 35 to 64 years	22,064	+/-2,318
Householder 65 years and over	10,964	+/-1,496
Householder not living alone:	9,800	+/-1,435
Householder 15 to 34 years	2,191	+/-855
Householder 35 to 64 years	6,013	+/-1,129
Householder 65 years and over	1,596	+/-537
Renter occupied:	90,263	+/-3,323
Family households:	50,489	+/-3,068
Married-couple family:	28,742	+/-2,014
Householder 15 to 34 years	14,722	+/-1,624
Householder 35 to 64 years	12,765	+/-1,575
Householder 65 years and over	1,255	+/-415
Other family:	21,747	+/-2,247
Male householder, no wife present:	6,820	+/-1,195
Householder 15 to 34 years	2,853	+/-841
Householder 35 to 64 years	3,851	+/-820
Householder 65 years and over	116	+/-99
Female householder, no husband present:	14,927	+/-1,975
Householder 15 to 34 years	6,766	+/-1,241
Householder 35 to 64 years	7,526	+/-1,523
Householder 65 years and over	635	+/-255
Nonfamily households:	39,774	+/-2,718
Householder living alone:	29,952	+/-2,669
Householder 15 to 34 years	9,439	+/-1,614
Householder 35 to 64 years	15,329	+/-1,964
Householder 65 years and over	5,184	+/-894
Householder not living alone:	9,822	+/-1,584
Householder 15 to 34 years	6,614	+/-1,280
Householder 35 to 64 years	3,133	+/-873
Householder 65 years and over	75	+/-73

Explanation of Symbols:

An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
