Note(s):

15   Total - Knowledge of official languages for the total population excluding institutional residents - 100% data

Knowledge of official languages refers to whether the person can conduct a conversation in English only, French only, in both languages or in neither language. For a child who has not yet learned to speak, this includes languages that the child is learning to speak at home.

For more information on language variables, including information on their classifications, the questions from which they are derived, data quality and their comparability with other sources of data, please refer to the Languages Reference Guide, Census of Population, 2016.

Total population excluding institutional residents refers to the total population excluding persons who live in institutional collective dwellings.

16   Total - First official language spoken for the total population excluding institutional residents - 100% data

First official language spoken is specified within the framework of the Official Languages Act. It refers to the first official language (i.e. (that is), English or French) spoken by the person.

For more information on language variables, including information on their classifications, the questions from which they are derived, data quality and their comparability with other sources of data, please refer to the Languages Reference Guide, Census of Population, 2016.

Total population excluding institutional residents refers to the total population excluding persons who live in institutional collective dwellings.

17   Official language minority

The official language minority population of Quebec includes all individuals with English as a first official language spoken and half of those with both English and French. The official language minority population of the country overall and of every province and territory other than Quebec includes individuals with French as a first official language spoken and half of those with both English and French.

18   Total - Mother tongue for the total population excluding institutional residents - 100% data

Mother tongue refers to the first language learned at home in childhood and still understood by the person at the time the data was collected. If the person no longer understands the first language learned, the mother tongue is the second language learned. For a person who learned two languages at the same time in early childhood, the mother tongue is the language this person spoke most often at home before starting school. The person has two mother tongues only if the two languages were used equally often and are still understood by the person. For a child who has not yet learned to speak, the mother tongue is the language spoken most often to this child at home. The child has two mother tongues only if both languages are spoken equally often so that the child learns both languages at the same time.

For more information on language variables, including information on their classifications, the questions from which they are derived, data quality and their comparability with other sources of data, please refer to the Languages Reference Guide, Census of Population, 2016.

Total population excluding institutional residents refers to the total population excluding persons who live in institutional collective dwellings.

n.i.e. = not included elsewhere

n.o.s. = not otherwise specified

19   Total - Language spoken most often at home for the total population excluding institutional residents - 100% data

Language spoken most often at home refers to the language the person speaks most often at home at the time of data collection. A person can report more than one language as 'spoken most often at home' if the languages are spoken equally often.

For a person who lives alone, the language spoken most often at home is the language in which he or she feels most comfortable. For a child who has not yet learned to speak, this is the language spoken most often to the child at home. Where two languages are spoken to the child, the language spoken most often at home is the language spoken most often. If both languages are used equally often, then both languages are included here.

For more information on language variables, including information on their classifications, the questions from which they are derived, data quality and their comparability with other sources of data, please refer to the Languages Reference Guide, Census of Population, 2016.

Total population excluding institutional residents refers to the total population excluding persons who live in institutional collective dwellings.

n.i.e. = not included elsewhere

n.o.s. = not otherwise specified

20   Total - Other language(s) spoken regularly at home for the total population excluding institutional residents - 100% data

Other language(s) spoken regularly at home refers to the languages, if any, that the person speaks at home on a regular basis at the time of data collection, other than the language or languages he or she speaks most often at home.

For more information on language variables, including information on their classifications, the questions from which they are derived, data quality and their comparability with other sources of data, please refer to the Languages Reference Guide, Census of Population, 2016.

Total population excluding institutional residents refers to the total population excluding persons who live in institutional collective dwellings.
