

**MEDIAN INCOME IN THE PAST 12 MONTHS (IN 2016 INFLATION-ADJUSTED DOLLARS)**  
**2016 American Community Survey 1-Year Estimates**

**Tell us what you think.** [Provide feedback to help make American Community Survey data more useful for you.](#)

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

1 - 30 of 30	Subject	Alaska			
		Total		Median income (dollars)	
		Estimate	Margin of Error	Estimate	Margin of Error
	Households	248,468	+/-2,841	76,440	+/-2,230
	One race--				
	White	73.3%	+/-1.0	82,684	+/-1,952
	Black or African American	N	N	60,363	+/-17,330
	American Indian and Alaska Native	12.0%	+/-0.7	47,824	+/-4,941
	Asian	4.7%	+/-0.5	79,048	+/-11,411
	Native Hawaiian and Other Pacific Islander	N	N	63,465	+/-33,118
	Some other race	N	N	76,260	+/-24,177
	Two or more races	5.3%	+/-0.6	62,811	+/-4,913
	Hispanic or Latino origin (of any race)	4.7%	+/-0.7	64,200	+/-11,210
	White alone, not Hispanic or Latino	70.5%	+/-1.0	83,106	+/-2,124
	HOUSEHOLD INCOME BY AGE OF HOUSEHOLDER				
	15 to 24 years	5.4%	+/-0.7	46,088	+/-9,069
	25 to 44 years	35.6%	+/-0.9	76,282	+/-3,490
	45 to 64 years	40.8%	+/-1.0	91,807	+/-3,552
	65 years and over	18.3%	+/-0.8	59,705	+/-3,814
	FAMILIES				
	Families	164,102	+/-4,083	88,604	+/-2,636
	With own children of householder under 18 years	46.3%	+/-1.7	79,496	+/-4,533
	With no own children of householder under 18 years	53.7%	+/-1.7	95,089	+/-4,449
	Married-couple families	74.4%	+/-1.7	102,909	+/-2,286
	Female householder, no husband present	16.8%	+/-1.3	47,557	+/-3,660
	Male householder, no wife present	8.8%	+/-1.0	71,493	+/-10,635
	NONFAMILY HOUSEHOLDS				
	Nonfamily households	84,366	+/-4,018	51,252	+/-2,380
	Female householder	44.8%	+/-2.1	43,693	+/-5,581
	Living alone	34.4%	+/-2.0	36,020	+/-3,995
	Not living alone	10.4%	+/-1.4	85,852	+/-11,499
	Male householder	55.2%	+/-2.1	56,725	+/-3,833
	Living alone	39.7%	+/-2.3	46,787	+/-5,443
	Not living alone	15.5%	+/-2.1	88,223	+/-14,154
	PERCENT ALLOCATED				
	Household income in the past 12 months	31.2%	(X)	(X)	(X)
	Family income in the past 12 months	32.7%	(X)	(X)	(X)
	Nonfamily income in the past 12 months	26.0%	(X)	(X)	(X)

**Explanation of Symbols:**

An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

When information is missing or inconsistent, the Census Bureau logically assigns an acceptable value using the response to a related question or questions. If a logical assignment is not possible, data are filled using a statistical process called allocation, which uses a similar individual or household to provide a donor value. The "Allocated" section is the number of respondents who received an allocated value for a particular subject.

While the 2016 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
