

**SEX BY AGE (AMERICAN INDIAN AND ALASKA NATIVE ALONE)**  
**Universe: People who are American Indian and Alaska Native alone**  
**2016 American Community Survey 1-Year Estimates**

**Tell us what you think.** [Provide feedback to help make American Community Survey data more useful for you.](#)

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the [Data and Documentation](#) section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the [Methodology](#) section.

		Alaska	
		Estimate	Margin of Error
1 - 31 of 31	Total:	108,056	+/-3,723
	Male:	55,461	+/-2,461
	Under 5 years	5,403	+/-591
	5 to 9 years	5,394	+/-909
	10 to 14 years	5,448	+/-1,026
	15 to 17 years	2,728	+/-439
	18 and 19 years	2,021	+/-536
	20 to 24 years	4,672	+/-809
	25 to 29 years	4,521	+/-637
	30 to 34 years	3,507	+/-637
	35 to 44 years	7,031	+/-955
	45 to 54 years	5,284	+/-570
	55 to 64 years	5,608	+/-748
	65 to 74 years	2,648	+/-416
	75 to 84 years	954	+/-258
	85 years and over	242	+/-109
	Female:	52,595	+/-1,929
	Under 5 years	4,665	+/-667
	5 to 9 years	4,457	+/-511
	10 to 14 years	3,894	+/-578
15 to 17 years	2,140	+/-370	
18 and 19 years	2,239	+/-630	
20 to 24 years	3,681	+/-547	
25 to 29 years	4,977	+/-740	
30 to 34 years	3,361	+/-487	
35 to 44 years	7,318	+/-832	
45 to 54 years	5,666	+/-528	
55 to 64 years	5,211	+/-539	
65 to 74 years	3,140	+/-510	
75 to 84 years	1,465	+/-375	
85 years and over	381	+/-137

**Explanation of Symbols:**

- An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
- An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
- An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
- An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
- An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
- An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
- An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
- An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

While the 2016 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
