B14004 | **SEX BY COLLEGE OR GRADUATE SCHOOL ENROLLMENT BY TYPE OF SCHOOL BY AGE FOR THE POPULATION 15 YEARS AND OVER**
Universe: Population 15 years and over
2016 American Community Survey 1-Year Estimates

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

	Alaska	
	Estimate	**Margin of Error**
Total:	584,670	+/-1,134
Male:	307,284	+/-1,996
Enrolled in public college or graduate school:	16,876	+/-2,363
15 to 17 years	83	+/-130
18 to 24 years	6,470	+/-1,078
25 to 34 years	5,430	+/-1,707
35 years and over	4,893	+/-1,096
Enrolled in private college or graduate school:	3,842	+/-1,008
15 to 17 years	0	+/-155
18 to 24 years	1,974	+/-859
25 to 34 years	882	+/-409
35 years and over	986	+/-484
Not enrolled in college or graduate school:	286,566	+/-3,217
15 to 17 years	15,903	+/-1,057
18 to 24 years	35,504	+/-1,887
25 to 34 years	56,741	+/-2,196
35 years and over	178,418	+/-2,482
Female:	277,386	+/-2,129
Enrolled in public college or graduate school:	20,184	+/-2,452
15 to 17 years	135	+/-180
18 to 24 years	7,528	+/-1,062
25 to 34 years	6,885	+/-1,323
35 years and over	5,636	+/-1,399
Enrolled in private college or graduate school:	2,489	+/-632
15 to 17 years	0	+/-155
18 to 24 years	529	+/-345
25 to 34 years	872	+/-379
35 years and over	1,088	+/-402
Not enrolled in college or graduate school:	254,713	+/-2,796
15 to 17 years	13,951	+/-1,204
18 to 24 years	23,642	+/-1,502
25 to 34 years	50,819	+/-2,456
35 years and over	166,301	+/-2,099

Explanation of Symbols:
An '*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The category "Not enrolled in college or graduate school" includes those who were not enrolled in school as well as those who were enrolled in levels other than college or graduate school.

While the 2016 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
